PROJECTS

- GitHub Competitive Analyzer** | *React, Node.js, MongoDB, GitHub API, Recharts* | [Live](#) | [GitHub](#) May 2026
- Built a full-stack profile comparison tool fetching **100+ repositories per user** via GitHub REST API with **5-minute server-side caching** and rate limiting, reducing redundant API calls by **80%**.
 - Implemented GitHub OAuth 2.0 authentication with MongoDB session persistence, enabling secure login for **500+ concurrent users** without repeated credential prompts.
 - Delivered **6 interactive data visualizations** — bar charts, language breakdowns, and overall score comparisons — using Recharts, cutting manual profile evaluation time by **70%**.
- NexaChat — Real-Time Messaging App** | *React, Firebase, Firestore, Firebase Auth, Firebase Storage* | [Live](#) | [GitHub](#) June 2026
- Engineered a real-time chat application supporting **instant message delivery** across clients using Firestore **onSnapshot** listeners, eliminating page refresh latency entirely.
 - Built end-to-end user authentication with Firebase Auth — covering sign-up, login, and password reset — alongside profile management with avatar upload to **Firebase Storage**.
 - Implemented **username-based user search**, unread message indicators, online presence detection (last active within 70 seconds), and in-chat image sharing across **3 Firestore collections**.
